

GENERAL CATALOGUE

ITALPARK è presente sul mercato da più di 50 anni. Lo scopo del fondatore, il signor Spinoni Beniamino è stato di imitare al meglio la pietra. Nel corso degli anni con grande caparbia e passione possiamo dire di esserci riusciti. Il nostro impegno continuo ci ha consentito nel 1978 di ricevere l'Apollo D'oro: ambito premio oscar europeo per le attività economiche.

Grazie all'utilizzo di materie prime esclusivamente italiane di ottima qualità, graniglia di marmo (il famoso marmo di Carrara) e cemento bianco, possiamo affermare con certezza che i nostri prodotti hanno un'ineguagliabile compattezza e resistenza a qualsiasi clima e intemperie.

La gamma degli articoli prodotti è vasta: vasi, statue, fontane, colonne, balaustre ed ancora basorilievi, busti, gazebi, capitelli ed altro. **ITALPARK** si distingue per la qualità di tutta la propria produzione: le finiture dei nostri articoli vengono eseguite con estrema cura completamente a mano.

La nostra presenza è ormai consolidata oltre che in Europa anche nei mercati dell'estremo oriente e negli U.S.A. a dimostrazione del fascino delle nostre creazioni.

Possiamo spedire i nostri prodotti in ogni parte d'Italia e del mondo grazie ad un particolare imballaggio che ne salvaguarda l'integrità durante il trasporto. Con soddisfazione affermiamo che i nostri prodotti sono manufatti tipicamente italiani che i nostri clienti commercializzano con successo.

The firm **ITALPARK** is present on the market from more than 50 years. The purpose, of the founder, Mr Spinoni Beniamino, was to do his best to copy the stone. We can say that year after year, thanks to our passion and obstinacy, we succeeded that purpose. Thanks to our continuous engagement, in 1978 we gained the "Apollo D'Oro", an important European prize for trade.

Thanks to use of exclusively Italian raw materials of excellent quality, marble's graniglia (the famous marble's Carrara) and white cement we can affirm with certainty our products have an incomparable compactness and resistance to any climate and bad weather.

The range of the products articles is wide: vases, statues, fountains, bodices, gazebo, capitals and much more. The firm **ITALPARK** is famous for the quality of its production: The finishing of our items are made by hand with extreme care.

At the moment our presence is consolidated besides in Europe also in the east markets and in the U.S.A. to demonstration of the charm of our creations.

We can send our goods in each part from Italy and of the world thanks to a particular packaging which safeguards the integrity during the shipment.

With great satisfaction we say that our products are typical hand-made italian items that our customers sell successfully.

La maison **ITALPARK** est présente sur le marché il y a 50 ans. Le but de Monsieur Spinoni Beniamino, le fondateur, a été celui de imiter au mieux la pierre. Au cours des ans, grâce à la passion pour le travail et à notre ténacité, on peut dire d'être arrivés à ce fin.

Notre engagement nous a permis de recevoir en 1978 "L'Apollo D'oro" un prix très important en europe pour les activités économiques.

Grâce aux matières premières exclusivement italiennes et de très bonne qualité que nous employons (marble de Carrara en grès et ciment blanc) on peut dire que nos produits sont vraiment compacts et ils supportent tous les climats et les intempéries.

La gamme des articles est très vaste: pots, statues, fontaines, colonnes, balastrades et puis bustes, chapiteaux, et d'autre encore. La maison **ITALPARK** se caractérise pour la qualité de toute sa production: les finissages de nos produits sont toutes faites à main avec grand soin.

Nous pouvons expédier nos articles en Italie comme dans le monde entier, grâce à un type d'emballage spéciale qui les protège pendant le transport.

Nous affirmons avec satisfaction que nos produits sont typiquement italiens et que nos clients les vendent avec succès.

ITALPARK ist seit über 50 Jahren auf dem Markt tätig. Das Ziel des Gründers, Benjamino Spinoni, war es den natürlichen Marmor möglichst perfekt nachzuahmen. Im Laufe der Zeit Und mit viel Fleiß und Hingabe, können wir mit Gewissheit sagen, das es uns gelungen ist. Als Lohn für unsere dauernden Anstrengungen haben wir im Jahre 1978 den „Goldenen Apollo“, den begehrten europäischen Oskarpriis für wirtschaftliche Tätigkeiten, erhalten.

Dank der Verwendung hochwertigster Rohstoffe, in erster Linie Carraramarmor und weißem Zement, können wir mit Sicherheit sagen, das unsere Produkte allen Witterungs- und Klimabedingungen standhalten.

Unsere Produktpalette reicht von Pflanzgefäßen über Statuen, Putten und Reliefs bis hin zu Springbrunnen, Säulen, Gartenmöbel, Balustraden uvm. was aber nur einen Auszug aus unserem großen Produktbereich darstellt.

ITALPARK zeichnet sich durch die Qualität seiner Produkte aus. Die Herstellung unserer Artikel erfolgt sehr sorgfältig, anschließend wird alles per Hand nachgearbeitet, so dass Produktionsnähte kaum noch ersichtlich sind.

Außer auf dem europäischen Markt sind wir mittlerweile auch im nahen Osten und auf Dem U.S. Markt vertreten.

Durch unsere besondere Verpackung ist eine Unversehrtheit gewährleistet und wir können unsere Produkte von Italien in die ganze Welt versenden.

Mit Stolz können wir behaupten, dass unsere handgemachten Produkte etwas typisch italienisches sind, mit denen wir und unsere Geschäftspartner erfolgreich handeln.

AVVERTENZE

I ns. articoli sono destinati a scopi esclusivamente decorativi, non devono essere utilizzati come elementi costruttivi, anche solo complementari. Decliniamo ogni responsabilità derivante da un loro improprio utilizzo.

Design, misure e pesi sono indicativi, noi ci riserviamo in qualsiasi momento e a nostro insindacabile giudizio di apportare modifiche allo scopo esclusivo di migliorare la produzione.

I kit idrici e luminosi (sui quali si consiglia il collegamento con salvavita e magnetotermico adeguato) sono un insieme di accessori necessari a rendere funzionanti e luminose le ns. fontane. Appositi passaggi e allacciamenti già predisposti nel manufatto rendono semplice l'installazione.

Durante il periodo invernale tutte le parti delle fontane devono essere svuotate dall'acqua (anello in rame, tubazioni, ciotole e pompe).

Per un corretto funzionamento i faretti devono essere obbligatoriamente collegati al trasformatore e sempre immersi nell'acqua.

I kit idrici e luminosi vengono forniti solo su specifica richiesta ed imballati a parte.

CAUTIONS

Our articles are destined exclusively for decorative purposes; they cannot be used as building elements, even though additional. We decline all responsibility deriving from misuse.

Design, sizes and weights are approximate we reserve the right to make changes at any time with the sole object of improving our production.

The water-and lighting kits (for which the connections/links with an electric safety and a magneto-thermic systems are highly recommended) are a series of accessories that light and make our fountains work.

Installation is extremely simple thanks to the special built-in passages and connections.

During the winter season all components of our fountains must be emptied out from water (copper ring, pipes, bowls and pumps).

To work properly lights must be compulsorily connected to the transformer and always dipped into water.

The water and lighting kits are supplied upon request and packed separately.

INSTRUCTIONS

Nos articles sont destinés exclusivement à la décoration des intérieurs; ils ne doivent pas être utilisés comme des éléments de la construction, même si complémentaires. Nous déclinons toute responsabilité due à un usage impropre.

Motif, mesures et les poids sont indicatifs. Nous e réservons le droit d'apporter des modifications en tout moment et à notre jugement afin d'améliorer notre production.

Les kits (accessoires) hydriques et lumineux (pour lesquels on conseille vivement la connexion avec un disjoncteur et un système de contrôle magneto-thermique) sont nécessaires au fonctionnement et à l'illumination de nos fontaines. Des passages et des branchements déjà prévus dans nos produits simplifient l'installation.

Pendant l'hiver toutes les parties des fontaines doivent être vides de l'eau (la bague en cuivre, les conduites, les bols et les pompes).

Pour fonctionner correctement les petits phares doivent être obligatoirement connectés au transformateur et toujours dans l'eau.

Les kits hydriques et lumineux sont fournis seulement sur demande et emballés séparément.

ANWEISUNGEN

Unsere Artikel sind nur für die Ausstattung geeignet; sie müssen deshalb nicht als Bauelemente, auch wenn zusätzlich, verwendet werden. Wir weisen jede Verantwortung für eine unpassende Benutzung zurück.

Entwurf, Masse und Gewichte sind anzeigend. Italtarkas vorbehalt sich das Recht irgendwann Veränderungen einzuführen, um die Produktion zu verbessern.

Die Wasser- und Lichtkits (für die Erdstrom Schutzvorrichtung und die Wärme- und Magnetische Schaltung empfohlen sind) benötigt man, um unsere Brunnen in Betrieb und leuchtend zu setzen.

Dafür vorgesehene Durchgänge und Anschlüsse vereinfachen die Installation.

Während des Winters müssen alle Brunnenteile vom Wasser ausgeleert werden (Kupfering, Röhre, Bassins und Pumpe).

Um richtig zu funktionieren, müssen die Leuchte obligatorisch zum Transformator verbunden werden und immer im Wasser liegen.

Die Wasser- und Lichtkits werden nur auf Wunsch versorgt und besonders getrennt verpackt.

CONSIGLI PER LA MANUTENZIONE

E' importante aver cura dei propri vasi anche quando rimangono vuoti. Se non si provvede al drenaggio dell'acqua per un vaso che ospiti una pianta, può accadere che, otturandosi il foro sul fondo del vaso, la pioggia vi ristagni e, con l'inverno, che quest'acqua geli. Con la naturale espansione del ghiaccio, il vostro vaso si può rompere. Per evitare questo spiacevole inconveniente è opportuno, sia per la salute delle piante che per la salute del vaso provvedere a:

- Mantenere libero il foro di sfocio dell'acqua disponendo su di esso pezzi di un vecchio vaso rotto oppure piccoli sassi.
- Richiede una certa attenzione anche il suolo su cui poggia il vaso. Un terreno argilloso può otturare il foro di uscita dell'acqua dall'esterno anche se abbiamo provveduto al drenaggio interno del foro. E' consigliabile rialzare un po' il vaso dal suolo o disporre di un apposito sottovaso.
- Il vaso a questo punto può ospitare la pianta o rimanere vuoto.

SUGGESTIONS FOR THE MAINTENANCE

It is important to take care of the vases also when they are empty. If water is not drained by a vase that contains a plant, it can happen that, the hole clogging on the bottom of the vase, the rain stagnates and freezes during the winter. Consequently, with the natural expansion of the ice, the vase could break. In order to avoid this inconvenient, it should be better to act as it follows:

- Keep the water drainage hole free, by placing some pieces of a broken vase or some small stones on it.
- Also the ground where the vase leans needs particular attention. A clayey ground may clog the hole from the outside even if there is the drainage from the inside. It should be better to raise a little the vase from the ground or maybe put it on a special saucer.
- Now the vase can host a plant or remain empty.

CONSEILLES POUR LA MANUTENTION

Il est important d'avoir soin des vases même quand ils sont vides. Si on ne pourvoit pas au drainage de l'eau pour en vase qui contient une plante, il peut arriver que le trou sur le fond du vase s'obture et que la pluie y stagne. Pendant l'hiver, cette eau peut geler et, avec l'expansion naturelle du glace le vase peut se casser. Pour éviter cet inconvenient il saurait mieux de pourvoir à :

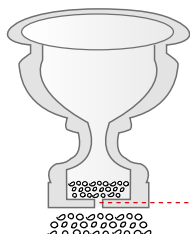

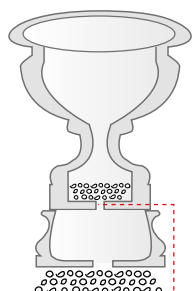

- Maintenir libre le trou de drainage de l'eau en y posant des petites pierres ou des morceaux d'un vase cassé.
- Il faut faire attention aussi au sol où se trouve le vase. Un terrain argileux peut obturer le trou de sortie de l'eau de l'extérieur même si on pourvoit au drainage intérieur du trou. On conseille de lever un peu le vase du sol ou de disposer d'un dessous de pot spécial.
- Maintenant, le vase peut accueillir une plante ou rester vide.

ANWEISUNGEN ZUR PFLEGE

Es ist sehr wichtig auch auf leere Vasen ohne Inhalt zu achten. Wenn das Wasser in einer bepflanzten Schale nicht abläuft, kann es passieren, dass das Loch der Vase verstopft, Wasser staut sich, und im Winter kann es dann zu Frostschäden kommen. Um solche Schäden zu vermeiden sollte man folgendes beachten:

- Halten Sie die Abwasseröffnung immer frei, legen Sie einige Stücke einer zerbrochenen Vase oder kleinere Steinchen darauf.
- Stellen Sie die Vasen auf Füße, damit die Feuchtigkeit darunter entweichen kann.
- Im Fachhandel sind Imprägnierungen erhältlich. Die Erhöhen die Lebensdauer.
- Wenn Sie diese Hinweise beachten, werden Sie für eine Lange Zeit viel Freude mit unseren Produkten haben!

TRATTAMENTI

TREATMENTS TRAITEMENTS BEARBEITUNGEN

I trattamenti che proponiamo su tutta la gamma dei nostri prodotti viene eseguita completamente a mano. L'aspetto finale è un invecchiamento quasi naturale che risalta le decorazioni ed i dettagli dei nostri modelli.

Il trattamento IDROPELENTE (vedi n. 3-4-5-6-7-8-9-10-11) ha le seguenti funzioni:

- rallenta l'invecchiamento naturale
- rende impermeabile la superficie dei ns. prodotti
- dona maggior resistenza a tutti gli agenti atmosferici (soprattutto al gelo).

Produciamo 11 diversi tipi di sfumature:

1. Bianco naturale
2. Bianco antico
3. Bianco naturale + lucido
4. Bianco antico + lucido
5. Sfumatura tufo
6. Sfumatura terracotta
7. Black 2.0
8. Old London
9. Pietra delle Alpi
10. Bronzo
11. Antiquariato Design 2.0

The treatments that we propose on our range are typically handmade.

The final appearance is an aging almost natural that show the decorations and the details of our models.

the water repellent treatment (see nr 3-4-5-6-7-8-9-10-11) has the following functions:

- it slows the natural aging
- it waterproofs the surface of our products
- it gives more resistance against the atmospheric agents (especially ice).

We produce 11 different kind of nuances:

11. Natural white
12. Antique white
13. Natural white + shiny
14. Antique white + shiny
15. Tufo nuance
16. Terracotta nuance
17. Black 2.0
18. Old London
19. Alps stone
10. Bronze
11. Antiquariato Design 2.0

Les traitements que nous proposons pour tous nos articles sont faits à main. L'aspect finale est près du vieillissement naturel et cela met en évidence les décorations et les détails des articles. Le traitement hydrofuge (regardez nr 3-4-5-6-7-8-9-10-11) il a les fonctions suivantes:

- il ralentit le vieillissement naturel
- il imperméabilise la surface de nos articles
- il donne majeure résistance aux agents atmosphériques (surtout le gel).

Nous pouvons créer 11 nuances différentes:

1. Blanc naturel
12. Blanc antique
13. Blanc naturel + brillant
14. Blanc antique + brillant
15. Nuance tufo
16. Nuance terre cuite
17. Black 2.0
18. Old London
19. Pierre des Alpes
10. Bronze
11. Antiquariato Design 2.0

Die von uns vorgeschlagene Bearbeitungen auf die ganze Produktion werden komplett handgemacht. Das endliche Aussehen ist eine fast natürliche Alterung, die die Dekorationen und die Details unserer Modelle hervorhebt.

Die wasserabweisende Imprägnierung (siehe Nr. 3-4-5-6-7-8-9-10-11) hat darüber hinaus folgende Vorteile:

- es verlangsamt den Alterungsprozess (Ansetzen von Patina / Grünspan)
- die Oberflächen sind wasserabweisend und trotzdem atmungsaktiv
- die Produkte werden gegen Umwelteinflüsse geschützt und es erhöht die Lebensdauer.

Wir stellen 11 verschiedene Nuancen her:

11. Natural weibes
12. Antik weibes
13. Natural weibes + 1v1glänzende
14. Antik weibes + glänzende
15. Nuance tufo
16. Nuance terracotta
17. Black 2.0
18. Old London
19. Alpenstein
